Education

D. Y. Patil College of Engineering, Akurdi – B.E. in Computer Engineering 2023 – 2027
CGPA: 9.15/10.0 | HSC: 73.42% (YCIS, Satara)

Professional Summary

Versatile Software Engineer with a strong foundation in Computer Science Fundamentals, Object-Oriented Programming (OOP), and Python. Experienced in system architecture design, building REST APIs, and scaling applications in cloud environments. Adept at comprehensive software testing, debugging complex issues, and leveraging fundamental networking concepts (TCP/IP, routing) to deliver robust, high-performance applications with intuitive UI/UX design.

Technical Skills

Programming & Scripting Languages: Python, JavaScript, TypeScript, Java, SQL

Software Engineering & Core Concepts: Object-Oriented Design (OOD), Data Structures & Algorithms, Architecture Design, Use Cases, System Design

Networking & Testing: TCP/IP, Routing & Switching, Software Testing, Unit Testing, Debugging, Troubleshooting

Cloud Computing & DevOps: AWS (EC2), Oracle Cloud Infrastructure, Git, GitHub, Version Control Systems, Scalability

Web & Mobile Application Development: React.js, Node.js, Express.js, Next.js, HTML, CSS, Tailwind CSS, UI/UX Design, Android Studio

Database Systems & Frameworks: MongoDB (NoSQL), MySQL, Firebase, Framer Motion, React Hook Form, Zustand

Professional Experience

Software Engineering Intern – Mindmach Technologies, Bengaluru Oct 2025 – Feb 2026

- Architected and deployed ShortlistAI, designing scalable cloud infrastructure on AWS EC2 to handle automated resume optimization algorithms.
- Wrote robust, object-oriented code and implemented comprehensive software testing methodologies to ensure platform reliability across edge use cases.
- Debugged complex data extraction issues within a custom Chrome Extension, utilizing advanced troubleshooting techniques to optimize UI/UX and API latency.

Full-Stack Developer Intern – Suvidha Foundation Sep 2025 – Oct 2025

- Engineered an AI-powered Article Summarization platform utilizing Python and MERN stack principles, actively addressing scalability bottlenecks.
- Designed RESTful APIs for database communication, applying networking fundamentals to ensure secure, efficient client-server data transfer.

AWS Cloud Virtual Intern – Eduskills Jan 2025 – Feb 2025

- Configured scalable cloud environments and gained deep familiarity with deployment pipelines and resource monitoring.

Projects

ShortlistAI – Scalable Resume Optimization Suite

[View Live Site](#) 🌐

- Developed a full-stack platform featuring ATS scoring and real-time open-source LLM integrations.
- Applied UI/UX design principles to build an intuitive browser extension capable of real-time DOM parsing.
- *Tech Stack:* Next.js, TypeScript, Open Source APIs, Cloud Hosting, Object-Oriented Design

Vibly – Real-Time Social Media Architecture

[View](#) 🌐

- Engineered full-stack social platform utilizing TCP/IP protocols and WebSockets for real-time messaging and authentication states.
- Scaled backend MongoDB schema and debugged complex state-management issues to ensure seamless user experiences.
- *Tech Stack:* React.js, Node.js, Express.js, MongoDB, Zustand

Plant Disease Detector – Computer Vision Classifier

[View](#) 

- Programmed a deep learning model using Python achieving 96% accuracy across multiple agricultural use cases.
- Conducted extensive software testing on data augmentation pipelines to improve model reliability in production environments.
- *Tech Stack*: Python, TensorFlow, Keras, Streamlit

Certifications

Oracle Cloud Infrastructure 2025 AI Foundations Associate – Oracle Deep Learning Fundamentals – NVIDIA

Achievements

-
- Participated in the Big Code Challenge qualifier round hosted by Google India, showcasing aptitude for advanced problem-solving and Computer Science Fundamentals.
 - Selected as FFE Scholar for academic excellence; Secured Top-15 rank with 9.78 CGPA among 800+ students.
